

CALOR TORCH FOR CUTTING AND WELDING

CALOR WELDING TORCH

- The Calor torch for cutting and welding is a torch with interchangeable lance. It is made of chromium plated brass, it is strong, reliable and its components are chosen with care.
- It allows to weld up to 50mm thick parts and to cut up to 300mm.
- It is the right size to carry out any work of welding, brazing, heating and cutting.
- The Calor torch is also available with heating lances with multi-hole copper tips, which allow to work with powerful flames.
- This is the ideal torch for superficial hardening, forging and heating materials.

■ **Calor brass handle**
Code 8201

■ **Calor welding lance**
Acetylene or Propane

■ **Calor welding tip**
Acetylene or Propane
